

TR flex 650gr

Lawn reinforcement net, protects the garden and prevents the dog from digging holes

A dog may have the habit of digging holes in the garden if it gets bored, is stressed or just want to hide its food or play. If your dog digs near the fence of your home, it could escape passing under it. The holes also ruin the garden and make its maintenance difficult.

To protect the lawn without hurting your dog, the TR FLEX diamond plastic mesh for turf reinforcing, is the perfect solution. Laid on the grass, it reinforces the turf and prevents your dog from digging holes, keeping your outdoor space always green and beautiful thus facilitating its maintenance. Produced with HDPE (high density polyethylene), it is effective for dogs of any size, the rolls are lightweight and easy to transport.

Installation

- Lay the net directly on the surface to be reinforced
- Tension the net tightly, taking care it adheres to the ground
- Fixing to the ground with U pins, it advisable every meter

Advantages

- Once the net has been installed, the surface can withstand vehicular traffic
- The mesh is easy to cut with simple scissors or cutters and it is easy to shape to fit curved borders of lawns and flowerbeds
- Once the grass has grown, the net will be hidden from view guaranteeing an excellent aesthetic impact
- Simple and quick to install, it can be laid directly on the surface to be reinforced and it can be used also on existing lawns
- After the installation, you can use your lawn mower without problems
